Experience

Freelancer Developer

Culiacán, Sinaloa
February 2023 - January 2024

- Architected and delivered custom backend solutions for local businesses, directly optimizing operational workflows and process automation.
- Designed and maintained RESTful APIs to facilitate seamless data exchange between business applications and modern frontend interfaces.
- Implemented secure database schemas and migration strategies, transforming manual record-keeping into efficient, digital data management systems.

Coppel Developer (Financial Services)

Culiacán, Sinaloa
January 2024 – June 2025

- Developed and maintained APIs for Coppel's financial services systems and applications.
- Implemented diverse software and database solutions across previously unfamiliar technology stacks, showcasing rapid adaptability and learning capabilities.
- Played a pivotal role in mitigating a company-wide incident by swiftly planning and deploying effective solutions, ensuring minimal disruption to operations.
- Engaged in other tasks besides developing, such as server configuration, image orchestration, vulnerability scanning, CI/CD pipelines, etc.

Coppel Senior Developer (Ecommerce)

Culiacán, Sinaloa
June 2025 – Present

- Led the development and maintenance of APIs for Coppel's e-commerce systems, supporting business growth and a large user base.
- Spearheaded the design and implementation of new software solutions, integrating multiple technologies to improve system performance.
- Mentored and provided technical guidance to junior developers, ensuring code quality and adherence to best practices.
